

Quality of Life of Civil Servants and Retirees in Iran

The Iranian Students Polling Agency (ISPA)

2020

Summary

World Health Organization defines quality of life as an individual's perception of their position in life in the context of the culture and value systems in which they live and in relation to their goals, expectations, standards and concerns. The secondary data analyzed in the study had been collected from the civil servants and retirees using WHO quality of life questionnaire (WHOQOL) in 2019, wherein the major focus was on the four dimensions of physical health, mental health, social relationships, and environment.
